

ARTISAN GUIDE

Frozen Pizza Dough (340g)

Generous 340g ball • Fits 12–14" (30–35 cm)

Option A: Slow Thaw (Best Texture)

1. **In fridge:** Place dough in a lightly oiled sealed container for **12 to 24 hours**.
2. **Room temp:** Take out **1.5 to 2 hours** before baking to soften and stretch easily.

Option B: Fast Thaw (Same Day)

1. **Room temp:** Keep dough sealed in its bag or covered bowl for **3.5 to 4.5 hours**.
2. **Ready when:** Soft, lightly puffed, and no longer cold at the center.

Prevent Dough From Sticking

- ✓ **Semolina / Rice Flour:** Dust table generously with semolina (semola) instead of white flour for easy slide & crispy crust.
- ✓ **Lightly Oil Bowl:** Makes the thawed ball slide right out.
- ✓ **Parchment Paper Trick:** Stretch straight on baking paper to slide into your oven effortlessly.

Shaping & Stretching

1. **No rolling pin:** Keeps airy bubbles intact.
2. **Fingertips:** Flatten gently from center outward, leaving a 1-inch border (*cornicione*).
3. **Stretch:** Rotate across knuckles to 12–14" (30–35 cm).

Home Oven Baking

1. **Max heat:** Preheat oven & tray/stone to max (**250°C–275°C / 480°F–530°F**) for 30+ min.
2. **Top lightly:** Avoid excess moisture/sauce for a crisp base.
3. **Bake: 7 to 10 min** until bubbling & golden crust.

Keep frozen at -18°C (0°F) • Do not refreeze thawed dough
